Comments on Niklas Muenninghoff
in his internship at JAXA Space Education Center

In the context of an internship Niklas Muenninghoff spent time at JAXA (Japan Aerospace Exploration Agency), Sagamihara Campus (宇宙航空研究開発機構、相模原キャンパス) during the month of July and August.

Mr. Muenninghoff has a very agreeable character, being always reliable and very ambitious in his work. During his time here, he was not afraid to come up with his own initiatives. His behavior towards the people in his environment, be it superior or colleagues was always friendly and in an appropriate way.

Overall it was a big pleasure having Mr. Muenninghoff and we hope to see him again at JAXA very soon.

A handwritten signature in black ink, reading "Kaori Sasaki".
